

FICCI WORKSHOP ON Achieving Manufacturing Excellence

INTRODUCTION

Manufacturing Excellence is a dedication to excel at all times i.e. every shift, every day, every shipment and recognition that every person is important. In today's competitive environment, organizations need to follow good manufacturing practices for achieving zero defects, high quality products, timely delivery, safety and increased productivity in order to be competitive. Improvement in manufacturing techniques on a continuous basis is imperative to be competitive. But this is easier said than done. In order to achieve this excellence level, practical training and sessions are required from time to time for managers and professionals. In this context, FICCI is organizing series of workshops on "Achieving Manufacturing Excellence in India". The first in the series is being organised in Chennai on 21 May 2014 at 10:30 am.

FACULTY

The workshop will be conducted by highly experienced and working professional from manufacturing. Mr. M.M. Singh, Chief Operating Officer (Production), Maruti Suzuki India Ltd will conduct the session. Mr Singh has 36 years of experience in production. He is a Pioneer of "Low cost, High quality, High volume & Flexible manufacturing way" in India, with a focus on people involvement and empowerment. He introduced innovative ways for enhancing capacity and productivity by introducing flexi-lines for assembly to take care of demand volatility in Maruti. He is adept at mentoring and building large teams. In 2005, he conceptualized an innovative program named as "Production Management System" or PMS. PMS is a system based program evolved with the involvement of people at all levels. PMS focuses on involvement, empowerment and integration of the human capital of the organization with linkage to focus areas and challenges prevailing from time to time.

METHODOLOGY

Case Based Learning- Videos based cases and sharing of experience

WORKSHOP CONTENTS

- a) Manufacturing transition in last 10 years
- b) How to produce without Fire Fighting?
- c) How to ensure high productivity and best quality?
- d) Myths and Realities of manufacturing-Real life issues and how to resolve?
- e) Driving Innovations in production
- f) Paradigm of improvement and consistency
- g) How to achieve breakthrough results?
 - 50% Increase in Productivity
 - 20% Cost Reduction

FORMAT OF WORKSHOP

Class Room Training

Tea Break

Exercises, Q&A session

Lunch

WHO SHOULD ATTEND?

- Production Heads/Managers
- Quality Control/Assurance personnel/Managers
- Maintenance engineers
- Supplier Quality personnel
- Process design engineers
