

# SMART MOBILITY CONFERENCE

20th November 2017 – New Delhi

# SMART MOBILITY CONFERENCE

20th November 2017 – New Delhi

**S**mart Mobility Conference focuses on solutions that enable faster, greener and cheaper transportation of people and freight while reducing congestion. Such solutions have the potential to increase public and private welfare while unleashing a new wave of economic development.

India can reduce energy demand by 64 per cent and carbon emissions by 37 per cent with the help of connected, shared and electric passenger mobility across the country. Optimizing e-mobility use for everyday life with greater thrust on use of public transport, e-mobility, metro solutions and use of waterways as means for mass transit could prove game-changer in addressing the issue of air pollution in urban areas.

With enriched deliberations from business leaders and market experts, the Conference aims to deliver the highest quality content, explore a future urban mobility ecosystem that delivers seamless intermodal transportation and highlight economic avenues for investment.

The first edition of Smart Mobility Conference will be held on Monday, 20 November 2017 at Federation House, Tansen Marg, New Delhi.

It brings together central and state government officials, policymakers, research bodies, multilaterals, financial institutions, industry players, start-ups, and academia on a common platform to deliberate on key developments and challenges for smart transport infrastructure in India and the way forward.

## Excellent opportunities to the participants:

- ❖ The Conference seeks to engage a diverse stakeholder community with interests spanning a broad technology portfolio for developing interconnected and intelligent transportation system.
- ❖ Establishing a learning platform to provide resource sharing, build strategic alignment and harmonize priorities of the government and industry.
- ❖ Network with top policy makers, government and be inspired by the illustrious insights of eminent experts and thought leaders
- ❖ A viable platform to capture emerging opportunities to accelerate the deployment of urban mobility solutions.
- ❖ Engage in stimulating discussions on strategic thrusts, challenges and benchmark best practices from success stories.

## Key Topics of Discussion

- ❖ Adopting Intelligent Transport System (ITS)
- ❖ Low carbon vehicles, including electric vehicles, hybrid and hydrogen
- ❖ Emissions reduction and environmental considerations
- ❖ Charging/refueling infrastructure
- ❖ Metro as a solution to mass rapid transit system
- ❖ Internet of things and big data application in transport
- ❖ Digital technologies for better traffic flow management
- ❖ Smart parking technologies
- ❖ Emulating success stories

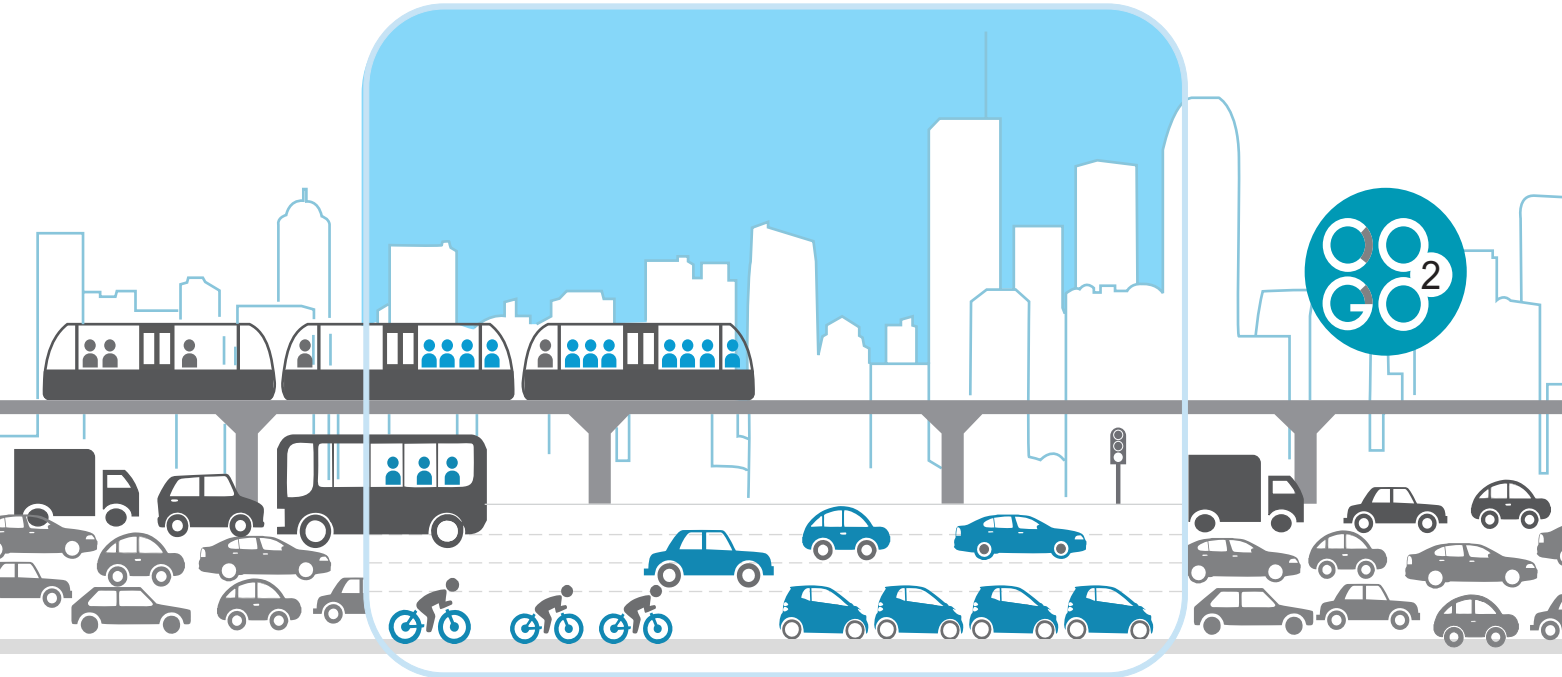

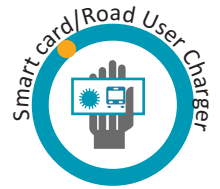

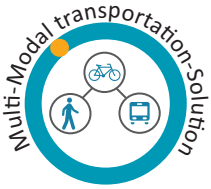

## Target Audience

- ❖ Government & Public Sector Undertakings
- ❖ Infrastructure Developers (Public/ Private)
- ❖ Construction Companies
- ❖ Consultants (Environmental/ Engineering/ Project Management)
- ❖ Construction Equipment Manufacturers/ Suppliers
- ❖ Asset & Fund Management Companies
- ❖ Private Equity (PE) Investors
- ❖ Financial Institutions
- ❖ Transport Authorities
- ❖ Electric Vehicle Manufacturers
- ❖ City and Transport Infrastructure Contractors
- ❖ Decision Makers and Advisors
- ❖ Technology & Service Providers
- ❖ Sustainable Solution Providers
- ❖ IT Solutions Providers
- ❖ Academic & Research Bodies
