

Industry 4.0 - Predictive Maintenance (IIOT)

15th July 2020 (Wednesday)

1500 Hrs -1630 Hrs

Condition monitoring solutions for predictive maintenance systems

Sensors

Virtual sensors

Interface for digital/analogue sensors

Communication interfaces

Threshold values or general status information can be communicated externally

(via normal Industrial Ethernet dialects)

Integrated PLC

Local pre-processing of data with the integrated PLC

Pre-processing of threshold values

Mr. Amit Deokule,
General Manager-
Sales & Marketing,
NORD Drivesystems

Mr. G Satyakumar
Senior Manager,
NORD
Drivesystems

Mr. Ziebarth
Hendrik
Application
Engineer,
NORD
Drivesystems,
Germany
