## Online Practical Training Programme on Construction Safety with Case Studies

Owing to increase in number and complexity of operations, the construction industry has become more dangerous. It employs skilled and unskilled labour subject to site accidents & health risks.

Due to lack of Management commitment, poor coordination between contractors, clients, site supervisors & workforce, unsafe work site conditions & unsafe behavior results in alarming number of fatal accidents in this sector.

**FICCI, DGFASLI, Min. of Labour & Employment, Govt. of India and Siemens SITRUST** brings to you a Training Program on “Construction Safety” which includes best practical strategies suitable for India. The program focuses on BOCW Act, 1996 & “Learning through real life case studies & Master by implementing”.

### Coverage:

The topics to be covered during 2 Days Training Programme are:

- Practical Safety issues encounter on Construction Site
- Accident causation theory & Principal of Accident Prevention
