

# Training Programme on Leadership & Behaviour Based Safety (BBS)

Achieving Safety Excellence requires going beyond the traditional safety focus of engineering & regulation. Because human behaviour is a contributing cause to most incident and injuries, safety Excellence can be only achieved by addressing the human dimension of safety. Reducing at-risk behavior and increasing safe behavior requires understanding how such behaviors are motivated by system and cultural influences.

**FICCI and The Safety Masters** brings to you a Training Program on “**Leadership & Behavior Based Safety**”. This program shall create a stronger and more clear sight, vision, drastic change in accident rate and motivate employees in safety culture development.

## Topics to be Covered with Industrial Case Studies :

The topics to be covered during half day Training Programme are

:

- Mindset, Behavior and Risk
- Traditional Safety vs BBS Model
- Effective Methods for Safe Worker Mindset
- How risk depend on employee’s behavior
- Manufacturing Human Dynamic
- Shift of mindset for positive safe behavior
- Indicators for MHD
- Safety Behavior Observation Process
- Collection of Peer to Peer observations
- Safety Culture Transformation
- Principle for Achieving Total Safety culture
- Behaviour Based profile setting
- Safe Behavior Analysis & Case studies
- Demonstration by Videos

## Who Must Attend :

- Plant In-Charge / Sustainability Officers
- Corporate OHS/HSE/ Safety Officers/ Chemical, Environment Engineers
- Decision Makers –Admin, HR & Trg. Officers
- Production, Operations Manager
- Project Site Managers & Construction Supervisors/ Managers
- Production & Operations Supervisors
- Electrical Safety Officers / Site Engineers
- Shop Floor Operators etc.

**2000 /-**  
**+GST Per Participant**

**BEHAVIOR  
BASED SAFETY**

**Training Programme  
On  
June 26<sup>th</sup>, 2021**

**10:30 am to 2.00 pm**
